

9 submissions for [nurturingpond](#)

You can select up to 2 submissions to be used to calculate your final leaderboard score. If 2 submissions are not selected, they will be chosen based on your best submission scores on the public leaderboard.

Your final score will not be based on the same exact subset of data as the public leaderboard, but rather a different private data subset of your full submission —your public score is only a rough indication of what your final score is.

You should thus choose submissions that will most likely be best overall, and not necessarily on the public subset.

Submission and Description	Private Score	Public Score	Use for Final Score
X_binary_imbalance_model.csv a few seconds ago ago by nurturingpond	0.78824	0.78824	<input type="checkbox"/>
